

a Final explanations, contrast battery (78 runs)**b Descriptive battery by world (88 scored)****c Capability without belief, treatment vs control****d The discovery is made; the hypothesis is not**

"Shared data acquisition pipeline, synthetic feed, or software mirroring artifact — A correlation of $r = 1.000$ persisting across 122 paired readings between physically distinct sensors across separate facilities ... is impossible in noisy physical systems. It decisively indicates ... automated mirroring of the pendulum_lab data stream into resonator_obs with a fixed 3-day delay."

Final hypothesis, gemini, treatment run wd_exact-seed2008
 $p = 0.89$ · judged class: instrument malfunction (apparatus)

22 of 38 treatment runs end on a final hypothesis describing the duplication or mirroring of one instrument's stream into the other — all ten Gemini runs in mirrored-, replayed- or synthetic-feed terms. None attributes it to an origin outside the world.
